Construct
Catalogue
column meanings, units and joins of each database
Generate SQL
with the requested depth and operations
Describe
exact steps in words, by code; a model writes the request
Mine benchmarks
BIRD and Spider questions
answered as asked and from an exact description
Diagnose
why the original failed; the other interpretation as an SQL edit
Choice library
110 choices in 13 types
query and its description
real example of the choice type
Test
Apply
edit the SQL; the answer must change
Write
requests for A, for B, and an open one
Evaluate
execution scores the answers
